### 👤 PROFILE

I am a Final Year Software Engineering student from NED University with hands-on experience in backend development using .NET and frontend development using Angular. I specialize in building secure, fast, and scalable web applications, including RESTful APIs and dynamic user interfaces.

I have strong skills in database design, SQL, logic building, and problem-solving.

With expertise in Angular, .NET, I can deliver complete full-stack solutions. I am comfortable using Git for version control, follow good coding practices, and collaborate effectively in team environments. Additionally, I have a growing interest in AI integration to enhance and automate intelligent solutions in real-world applications.

### 🎓 EDUCATION

#### BE (Software Engineering), NED University

September 2022 – present

I am currently enrolled in a Software Engineering program, actively working towards acquiring comprehensive knowledge and practical skills in the field. with 3.64 CGPA

#### HSC Pre Engineering, Delhi College

June 2020 – June 2022

Intermediate graduate with A+ distinction, demonstrating commitment to excellence through dedicated effort.

### 🔑 INTERESTS

Technology Exploration

### 🧠 SKILLS

#### Framework

. Net core  
Angular  
Flutter

#### Backend

ASP .Net core web API  
Entity frame work  
Identity frame work  
SignalR

#### Frontend

Angular, RxJs  
ASP.NET Core Blazor  
HTML5, CSS3, Tailwind, Bootstrap

#### Languages

c#, TypeScript, JavaScript, Python, C++, Dart

#### Database

Microsoft SQL Server, Firebase, using SQL, LINQ

#### Tools

Visual Studio, VS code, Postman, GitHub, Docker

### 📁 PROJECTS

**AgriConnect**, An e-commerce mobile application developed in Flutter, with the backend built using .NET Core Web API and deployed on Oracle Linux Cloud.
